You get your business. We get IT.

Company Overview

Bitnetix was founded in 2006 as an IT consulting company and added Voice Over IP (VOIP) products and services in 2009. We are located near Rochester, NY, with clients throughout the state, across the country, and around the world.

Savings

Our solutions produce significant ROIs, generally through **50%-90% reduction in costs** compared to legacy telephone service, within 12-24 months. **Client savings average \$300 per month** for a 20-seat office **and \$10,000 or more** per year in licensing fees for a 250+ seat organization.

Quality

By focusing on Cisco VOIP hardware and Open Source software, we **decrease costs, increase productivity**, and enable organizations to **meet quality control standards and reporting requirements**.

Teaming

We are actively seeking **teaming arrangements with other small businesses and prime contractors** looking for a quality oriented partner to help fulfill government supply needs.

Services

Voice Over IP Systems

We provide **complete design, installation, configuration, and management** of custom built phone servers and systems. We also **own and manage a hosted platform** for clients that have a need for remote phones without a central server. Our call routing, recording, and reporting capabilities provide customized solutions for unique telephone system needs.

VOIP Calling Services

Inbound, local, long distance, and international calling with voicemail, conferencing, time-based routing, queues, DISA, callback, and **dozens of other features** can be **added to existing services**, or clients can exclusively **use our services for their calling requirements**.

IT Consulting

Bitnetix assists clients with **ensuring that networks and IT infrastructures are able to work** at full capacity with our phone systems. **Bitnetix can act as an adjunct to (or in place of) existing IT staff** at an organization.

Project Management

We also provide **technical project management services**.

Letters of Reference Available Upon Request

Bitnetix took the time to ferret out the best intellectual approach to our specific office networking needs, built a system that is functional and economical, and is able to anticipate our needs for the future.

Oswego County Child Advocacy Center

Thank you for how the voicemail project turned out. Except for [updates], we never have to touch the system anymore!

Amherst (NY) Central Schools

I would not hesitate to recommend Eric, his Bitnetix team and Bitnetix VOIP servers for any VOIP deployment.
